

Dear Friends of CHHF,

During the summer in Honduras, the heat is unbearable. Many people are out working in the fields all day. Children are running and playing under the hot sun. People in the rural villages in Honduras don't always have enough clean water to stay hydrated.

Dehydration is a huge issue and can be life-threatening! The good news is that you can [save someone's life today by providing the medical care they need!](#)

The fastest way to treat anyone who is dehydrated is by giving IV fluids. IV fluids are not easy to come by in Honduras so your help is needed immediately.

[Can I count on you to send a gift of 2, 4, or maybe even 10 IV kits?](#)

[A kit costs just \\$7.](#) That's \$7 to possibly save someone's life!

Severe dehydration can affect the internal organs, cause low blood pressure and rapid heart rate. It's life-threatening!

I want to be sure there enough IV kits stocked and ready at the clinic to immediately treat anyone who is dehydrated. Will you help? [Your gift of \\$14 for 2 IV kits, \\$28 for 4 kits, or even \\$70 for 10 kits](#) will go a long way toward making sure we can help anyone in need.

[Every kit you send in will help save a life.](#) When dehydration is so severe it requires IV fluids, it is life-threatening. [Please send help today!](#)

God bless,

N. K. Hook, Jr.
President

P.S. [Please send your gift by June 15](#) to ensure there are enough IV kits to treat dehydrated patients this summer! Just \$7 will provide an IV kit and other medical resources!
