

"I am grateful to Clínica Carolina because I depend on you for my medications. Many of my friends and neighbors do too. Otherwise, I cannot imagine how life would be here in our area. You are angels to many. God bless you tons. "

September 12, 2018

Dear Friends of CHHF,

There's someone in remote Honduras that needs **your help. And because of matching funds, your gift can help TWICE as many people if you send it by October 1.**

In a few weeks, the rainy season will begin in Honduras. Because it is impossible for teams to get to Limón during the rainy season, the clinic will be closed from late October to February.

Many people desperately **need a supply of their medication** that will last them during the time the clinic is closed. People rely on the Limon clinic for their medical care, especially those with high blood pressure and diabetes. Patients need to take their medicine every single day.

It costs just \$7.62 on average to provide one person with the medicines they need until the clinic reopens in February. **How many people will you help? Can I count on you to help 5 or maybe even 15 people today?**

Many rely on the clinic for their medications. That's why it is so important that we help people get a supply of their life-saving medication before the clinic closes.

Please send in your gift of \$38.10 to help 5 people or \$114.30 to help 15 people by October 1. Your gift will provide life-saving medication and other essential care for people in remote Honduras. And, the first \$3,000 in gifts will be doubled. Thus, your gift to help 5 people can be doubled to help 10 people!

Please send your gift in by October 1. That's the last day I can order medicine to send with the October team to Honduras, so please be sure to send your gift early.

God bless,

Ken

N.K. Hook, Jr.

President

P.S. **Just \$7.62 provides one person with the medicine the need while the clinic is closed.** Matching funds will double your gift and provide medication for two people – but please send your gift by October 1!
