

CHHF CORONAVIRUS ALERT

Good afternoon,

There are so many unknown factors surrounding the coronavirus pandemic. We don't know how far or fast it will spread. We don't know how long this crisis will last, or how many around the globe will truly be affected. **We DO know the villages served by CHHF, even indirectly, will suffer.**

For over 25 year we, as a collective group who love and respect those in Honduras, have worked to increase health and wellness. Providing a sustainable source of maintenance medications for those who have hypertension, diabetes and asthma has been one of our main objectives. ***We have seen incredible progress.*** You are making a difference!

103-year-old Maria, like so many people in Honduras, credit medication she receives at CHHF clinic every month for her continued health.

Upcoming mission teams have been forced to cancel their mission trips due to the Coronavirus. For our volunteers, this is the safest option and is understandable. At this point there is no prediction as to how many more teams will need to cancel. However, we do have a **commitment to serve those in need.** Options the Board is considering are

- Sending medications already purchased by teams which had to cancel.
- Purchasing additional maintenance medication and shipping to Honduras.
- Hiring Honduran doctors to provide Maintenance Medication Clinics so our patients will not run out of hypertension or diabetes medications.

- Distributing 90 days' worth of maintenance medications to patients to help through the beginning of this crisis.

Can we count on you to make this possible? As you can imagine, the funds needed are not in our budget. ***Your donation today will ensure those needing help in Honduras have the medicine they need.*** Purchasing medications, shipping costs and making arrangements for dispensing the medications in Honduras will be costly. **You can make this happen!!**

I will donate NOW to provide life-saving maintenance medications to our patients in Honduras.

Today you can ensure Maria and others like her will receive the medication they need. Please don't delay, [send your donation now](#) so medications and shipping can be arranged.

The unknown is scary. There is so much we do not know about this pandemic. We know we need to secure the resources to help our neediest patients.

We are so glad we can ask for your support during such a difficult time. Your mean so much to the those who will be impacted indirectly but critically by the Coronavirus.

God bless,

Christine & David

Christine Mitchell
Executive Director

David Kelly
Director of Honduran Operations

P.S. – Please DON'T WAIT to send your gift. Having the funds available immediately is critical! Your gift today will help a patient in need!
